### REASONS FOR ALLOWANCE

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). The following is an examiner's statement of reasons for allowance:

None of the prior art of record discloses or suggests a transfective liquid crystal (LC) panel having the following features: a) a supertwisted LC layer having twist angle in the range of from 220 to 270 degrees; b) a reflective layer that is disposed on an *inner side* of the lower substrate and that reflects a portion of light incident upon the liquid crystal panel, a transmission area for performing transmission display and that is located at certain positions other than where the reflective layer is disposed c) wherein, in a pixel in a bright display of the liquid crystal panel, light emitted from the illuminating device and that is incident upon the upper polarizer from the liquid crystal layer is elliptically polarized light, and the product of an optical anisotropy  $\Delta n$  and a thickness  $d$  of the liquid crystal layer,  $\Delta n \cdot d$ , is in a range of from 820 nm to 950 nm; and d) the liquid crystal panel having a directional reflection function which causes light obliquely incident upon the liquid crystal panel to exit mainly in a direction perpendicular to the liquid crystal panel rather than in a specular reflection direction.
